Versatile Creative professional and AI Application Developer. Experienced in crafting precise, logic-driven prompts for Google Gemini models, with a strong background in UX/UI design and content creation. Passionate about AI reasoning, model safety, and pushing the boundaries of AI capabilities.

Featured AI Application Projects

Surabaya Public Transport Finder (AI Chatbot)

- Designed and deployed an interactive AI chatbot assistant using Gemini API to provide real-time guidance on Suroboyo Bus and Wira Wiri feeder routes.
- Implemented custom system instructions to ensure route accuracy and managed structured datasets to provide reliable logistical information.

AI Competition Scoring System

- Developed an automated database-driven scoring tool for multi-judge evaluations, streamlining complex data aggregation for 26+ participants.

Chroma Vault (Color Palette Library)

- Designed a multi-modal AI tool for color management, allowing users to input/generate palettes based on images or hex codes.
- Built logic-heavy prompt structures to handle data sorting, categorization, and bilingual (English/Indonesian) UI requirements.

Watercolor Illustration Studio

- Built AI-driven creative tools for content generation and maintained consistent creative style through optimized system instructions.
